CASE STUDY

CUSTOMER Large North American Seating Partner

END APPLICATION High Impact PP Copolymer Stadium Seating in the Orlando City Soccer Club

CUSTOMER PROBLEM The customer wanted highly chromatic colors developed that would withstand harsh exterior environments and long term exposure. They wanted a section of 49 rainbow colored seats to honor the victims of the Pulse nightclub shooting.

AMERICHEM SOLUTION Americhem used R&D to design a product with a stabilizer in it to stand up to the rigorous weathering testing.

AMERICHEM PRODUCT DESCRIPTION

- **COLOR:** Red, orange, yellow, green, blue, purple
- **COMPLIANCES:** ISO 4892-2

VALUE PROPOSITION When you work with Americhem, you not only end up with a polymer-based product that demonstrates the precise functional performance you need, but the expertise of a company that has been a leading provider of custom color matches since 1941. Americhem provided protection from UV light-induced degradation through adding quality to defend against weathering.
