

Americhem and Nexeo Plastics Announce New Partnership for Engineered Compounds Distribution Across North America

Cuyahoga Falls, OH (November 21st, 2023) – Americhem, Inc., a global industry leader in innovative polymer solutions, is pleased to announce they have launched a new partnership with Nexeo Plastics for engineered compounds distribution across North America. Effective November 1, 2023, Nexeo Plastics will serve as the preferred distributor of Americhem's full range of engineered compounds in North America, encompassing Canada, Mexico, Puerto Rico, and the United States.

This strategic move underscores Americhem's commitment to delivering top-tier engineered compounds, polymer solutions, and service to customers throughout North America.

Americhem CEO, John Richard added, "This collaboration marks a significant milestone in Americhem's journey. Combining our strengths and expertise in compounding with Nexeo's distribution platform allows us to drive innovation and create unparalleled value for our customers. Together, we are poised to redefine standards, foster growth, and shape an expansive future for our customers."

Nexeo Plastics CEO, Paul Tayler, expressed his enthusiasm for this agreement, stating, "We are thrilled to strengthen our collaboration with Americhem and expand our distribution capabilities for their engineered compounds. This partnership aligns with our mission to provide exceptional value to our customers by offering the highest quality materials and expertise to meet application challenges."

Americhem's array of engineered compounds covered by this agreement includes ColorFast[®], ColorRx[®], InColor[®], InElec[®], InLube[®], and InStruc[®]. Americhem's product portfolio is renowned for high quality tailored compounds that meet customers' unique requirements by optimizing performance and aesthetic properties such as structural integrity, lubricity, electrostatic dissipation, flame retardancy, critical color and more within thermoplastic products.

Each of Americhem's product lines feature distinctive characteristics, offering customers a spectrum of options to address specific needs and enhance the performance of their products. With this partnership, Americhem hopes to reach more regions and markets to deliver their customer engineered solutions.
