

AMERICHEM EXPANDS THEIR PRODUCT LINE OF MEDICAL PRECOLOR COMPOUNDS

CUYAHOGA FALLS, Ohio (October 25, 2018) – Americhem, a globally recognized designer and manufacturer of custom color masterbatch, functional additives, engineered compounds and performance technologies, has expanded their ColorRx® offering; a line of precolor compounds for medical applications. The portfolio now includes PC/ABS and PC/Polyester alloys.

ColorRx® PA-2000RX, PC/ABS, and ColorRx® FRPCT1100RX, PC/Polyester, have been tested by third parties to meet ISO 10993 biocompatibility standards and are UL listed as self-extinguishing. The PC/Polyester offers improved chemical resistance over standard grades of PC/ABS. Americhem Engineered Compounds provides fully supported testing for biocompatibility and chemical resistance. All ColorRx® products are available on a global basis to service global medical manufacturers.

"Our ColorRx® products have been tested for biocompatibility compliance meeting either USP Class VI or ISO 10993," said Jim Figaniak, Vice President and General Manager of Americhem Engineered Compounds. "We also offer locked formulations and short lead times with no minimum order quantity. These services help mitigate material risks to medical manufacturers and speeds up the product development process allowing faster commercialization."

Americhem's Suzhou, China manufacturing facility is ISO 13485:2016 and ISO 9001:2015 certified. Americhem Technical Marketing Director, S. Mani stated, "Our ISO 13485:2016 certification further demonstrates our commitment to the medical and health care markets."

About Americhem

Americhem is a globally recognized designer and manufacturer of custom color masterbatch, functional additives, engineered compounds and performance technologies. Our business is built around delivering Performance, Solutions and Trust through close collaboration with customers seeking to optimize their polymer products. All of the company's products are backed by complete technical support that ensures quality, reliability and value. Americhem operates 11 manufacturing plants and maintains sales offices throughout the world. Central research and development facilities and headquarters are located in Cuyahoga Falls, Ohio.
