AMERICHEM EUROPE PLANT RECEIVES IMPORTANT AUTOMOTIVE TECHNICAL CERTIFICATION

MANCHESTER, UNITED KINGDOM (June 19, 2014) – [Americhem Inc.](#), a global provider of custom color and additive solutions for polymeric products, recently received the prestigious ISO/TS16949:2002 certification for its Manchester, United Kingdom, plant. In tandem with this same certification at its Cuyahoga Falls, Ohio, U.S., plant, Americhem is now better able to provide global in-vehicle color harmony to OEMs and tier suppliers around the globe.

This technical specification, in conjunction with ISO 9001:2000, defines the quality management system requirements for the design and development, production and, when relevant, installation, and service of automotive-related products. This technical specification can be applied throughout the automotive supply chain.

“We’re proud to have the technical certifications that are most important to our customers,” remarked Brett Conway, Americhem’s global segment director for transportation. “As a truly global color and additive masterbatch provider, we thrive on providing the type of consistency, product quality and customer satisfaction that our automotive customers demand. We look forward to continuing to service their needs and striving for the latest industry requirements.”

Americhem will exhibit at the Automotive Interiors Expo 2014, June 24–26, in Stuttgart, Germany, stand A5130. For more information about products and services from Americhem, visit www.americhem.com.
