AMERICHEM TO GIVE KEYNOTE PRESENTATION ON 3D PRINTING AT SPE CAD RETEC 2015

CUYAHOGA FALLS, Ohio (Sept. 30, 2015) – [Americhem Inc.](#), a global leader in the production of color and additive solutions for polymeric products, will bring its color and compounding technical expertise to the 53rd Annual Society of Plastics Engineers (SPE) Color and Appearance Division (CAD) RETEC® 2015 Conference October 4–6, in Indianapolis.

Ron Beck, R&D Manager for Americhem, will be a keynote speaker, presenting a new paper, “3D Printing: The Disruptive Technology” on Monday, October 5, at 8:30 a.m.

“3D printing, or additive manufacturing, is truly a revolutionary technology, and it’s important that those in our industry understand the stakes and the possibilities it presents,” Beck said. “It has the potential to change the way we manufacture many everyday objects by overcoming the limitations of our current processes. Our industry should understand the hows, the whys and the potential of additive manufacturing.”

Beck’s paper explores at length the different types of 3D printing, the methodology behind each technique, and the potential that the process as a whole maintains as it continues to grow. Beck will discuss these findings and more throughout his presentation at SPE CAD RETEC while offering the expert insight that Americhem has built its reputation on throughout the industry.

“Additive manufacturing opens up many new possibilities—it’s an exciting time to be an engineer,” Beck continued. “People have a lot of big ideas when it comes to 3D printing, and we’re approaching the tipping point where those ideas can become reality. All that needs to be done to make this happen is opening engineers’ minds to these new ways of approaching design.”

Americhem is proud to be a part of SPE CAD RETEC 2015. For more information about the conference, visit www.specad.org. For more information on Americhem and its color masterbatch and additive manufacturing expertise, visit www.americhem.com.

About Americhem

Americhem is a global organization that delivers custom color and additive solutions for customers seeking superior performance and batch-to-batch consistency for their polymer products. The company specializes in color and additive masterbatches, and single pigment dispersions, all backed by complete technical support that ensures quality, reliability and value. Americhem operates nine manufacturing plants and also maintains a representative sales office in Luxembourg and Monterrey, Mexico. Central Research & Development facilities and headquarters are located in Cuyahoga Falls, Ohio. For more information visit Americhem.com or call 800.228.3476.
