AMERICHEM INFINITY ENGINEERED COMPOUNDS TO BE MANUFACTURED AT AMERICHEM'S NEWLY EXPANDED PLANT IN SUZHOU, CHINA

SUZHOU, CHINA (April 10, 2014) – [Americhem Inc.](http://www.americhem.com), a global provider of custom color and additive solutions for polymeric products, has announced that it will soon be manufacturing products of sister company Americhem Infinity Engineered Compounds at its newly expanded facility in Suzhou, China. Americhem Infinity compounds include specialty filled, reinforced, internally lubricated, electrically active and precolored engineering thermoplastics. The firm is headquartered in Swedesboro, N.J., U.S.A.

“As a part of the expansion of our Suzhou plant, Americhem is installing specific equipment that will enable us to manufacture Americhem Infinity compounds for customers in the Asia Pacific region,” said Stanley Teoh, Americhem’s general manager for the Asia Pacific region. “This will expand our product offerings in the region and enable current Americhem Infinity customers to receive locally supplied products.”

Americhem Infinity president, Carlos Carreno, indicated that nearly 30 percent of the company’s products have been exported from its Swedesboro manufacturing facility to China since the company’s inception in 2005. “We’re anxiously anticipating the ability to serve our Chinese and multinational customers better and to expand the product offerings that they have available locally,” Carreno said. The compounds are projected to be manufactured in Suzhou in early 2015 and until that time, Chinese customers will continue to be supplied from the company’s U.S. manufacturing plant.

Americhem Infinity specializes in highly engineered thermoplastic compounds, serving a variety of industries, including medical, electrical/electronics, business machines, IT/disk drive, aerospace/military, industrial and consumer products. The company focuses on service, speed and technical expertise for its customers. Americhem Infinity’s compounds are made with over 35 engineering resins, feature a wide variety of reinforcement and filler options and can contain up to several specialty additive packages.

About Americhem

Americhem is a global organization that delivers custom color and additive solutions for customers seeking superior performance and batch-to-batch consistency for their polymer products. The company specializes in color and additive masterbatches, and single pigment dispersions, all backed by complete technical support that ensures quality, reliability and value. Americhem operates eight manufacturing plants and also maintains a representative sales office in Luxembourg and Monterrey, Mexico. Central Research & Development facilities and headquarters are located in Cuyahoga Falls, Ohio. For more information visit Americhem.com or call 800.228.3476.

About Americhem Infinity

Americhem Infinity, located in Swedesboro, New Jersey, manufactures and sells custom compounded, engineering grade, polymer composites to meet the demands of specific customer applications. Utilizing fillers and reinforcements, and a broad variety of engineering resins, the company enhances the base resin properties and creates an infinite variety of compounded products in the form of plastic pellets.
