INFINITY LTL ANNOUNCES THE RELEASE OF SURLYN REFLECTION SERIES® FOR ASIA-PACIFIC

MORRISVILLE, PENNSYLVANIA (February 9, 2016) – Infinity LTL Engineered Compounds, a global manufacturer of custom compounded engineered thermoplastics, today announced the introduction of the Surlyn Reflection Series® brand of thermoplastic alloy technology in the Asia-Pacific region. The products will be produced at the company's facility in Suzhou, China. The Surlyn Reflection Series resins enable the production of tough, durable plastic components with a class A finish.

Surlyn Reflection Series resins contain a patented alloy of DuPont Surlyn® and nylon 6 resins only available through Infinity LTL. The products provide superior appearance properties, chemical resistance, excellent weatherability and scratch and mar resistance to ensure the critical OEM or designer-specified appearance is achieved.

"Surlyn Reflection Series resins are unique in that they provide exceptional durability and low temperature impact strength while imparting outstanding appearance characteristics such as color brilliance, surface gloss and distinction of image," remarked Don Hone, business manager for Infinity LTL. "With the availability of local supply, Surlyn Reflection Series resins now are a superior choice for plastics processors in the Asia-Pacific region."

With applications in markets such as power sports (including snowmobiles, ATVs, golf carts, jet skis and other marine equipment), automotive and transportation, building and construction, agriculture, lawn and garden, the Surlyn Reflection Series enables the production of attractive, weatherable components at a lower cost than competing technologies. The elimination of paint and the complete recyclability of Surlyn Reflection Series alloys enable manufacturers to produce attractive, weatherable parts with reduced environmental impact.

For more information about the Surlyn Reflection Series, visit www.ltlcolor.com or contact Don Hone at don.hone@ltlcolor.com.

Surlyn Reflection Series® is a registered trademark of E.I. duPont de Nemours and Company and is used under license by LTL Color Compounders, LLC.

About Infinity LTL Engineered Compounds

Infinity LTL Engineered Compounds, located in Morrisville, Pennsylvania, and Swedesboro, New Jersey, manufactures and sells engineering grade, custom compounded precolored polymer composites to meet the demands of specific customer applications. The company specializes in a wide range of engineered polymers with no minimum order size and provides a high level of technical support and a flexible customer-focused style. The company also offers a wide array of reinforcements, fillers and lubricants that enhance the base resin properties for many engineering resins. For more information, visit ltlcolor.com or call 800-863-4260.
