AMERICHEM ANNOUNCES NEW nDuramax® UV STABILIZERS

CUYAHOGA FALLS, OHIO (FEBRUARY 5, 2015) – [Americhem Inc.](#), a global provider of custom color and additive solutions for the polymer and synthetic fibers industries, will debut its new nDuramax® UV stabilizers for polymeric film products at NPE2015: The International Plastics Showcase, March 23-27, in Orlando, Florida, at booth S24027. Expanding from its roots into other industries Americhem serves, these products are built for outdoor exposure and come in options for PET, PE and ionomer resins.

As one of the largest producers of outdoor masterbatches in the world, Americhem will leverage its nDuramax technologies in a multitude of industries and end uses including vinyl siding, composite decking, synthetic turf, awning fabrics and many more.

“We offer a variety of UV stabilization grades from the least demanding to our highest-performance offerings,” said Roger Threadgill, Americhem’s market manager for films. “All of our products are customized for the specific customer containing the level of stability they desire. In addition, nDuramax can be combined with color and other additives to create customized multifunctional masterbatches.”

In general, Americhem’s offerings correspond with the conditions that the products will be exposed to. From product labeling, window films and photovoltaic films to protective, adhesive and industrial applications, Americhem will work to design solutions taking a holistic approach to design.

To learn more about nDuramax masterbatches, visit our website www.americhem.com/nduramax or email Scott Blanchard at sblanchard@americhem.com.
