**AMERICHEM TO DISPLAY AWARD-WINNING PRODUCT AT AUTO INTERIORS EXPO**

**CUYAHOGA FALLS, Ohio (June 16, 2015)** – [Americhem Inc.](#), a global provider of custom color and additive solutions for polymeric products, will be displaying its award-winning mold in color high-touch, high-gloss switch bezel for the Ford Fusion at the Automotive Interiors Expo, June 16-18 in Stuttgart, Germany. On display at stand number A5512, the company will also have its PACE award, which is an annual awards program, sponsored by Automotive News, for new products, manufacturing processes and innovation partnerships.

Americhem won the award in conjunction with BASF, Ford and Summit Polymers for showing dedication to the success of the entire supply chain by developing cutting-edge products. The nylon resin system that produces the part enables the elimination of paint and clearcoat for interior trim. Americhem's role in the award is for pigmentation and dispersion. In association with the other partners winning the award, Americhem advanced the ability of injection molding to produce durable, scratch-resistant class A surfaces.

"There are few awards that carry the prestige of Automotive News' PACE awards," remarked Brett Conway, Americhem's group director for plastics. "It is indicative of Americhem's strong customer orientation and reputation as a true partner in developing innovations to advance the automotive industry."

Americhem plants in Cuyahoga Falls, Ohio, and Concord, North Carolina, both received trophies to display in their facilities. Employees in these two locations were instrumental in producing color and additive masterbatches for the award-winning product.

To learn more about Americhem's automotive products, visit us at the Automotive Interiors Expo, stand A5512, June 16-18 in Germany or at [www.americhem.com](http://www.americhem.com).

**About Americhem**

*Americhem is a global organization that delivers custom color and additive solutions for customers seeking superior performance and batch-to-batch consistency for their polymer products. The company specializes in color and additive masterbatches, and single pigment dispersions, all backed by complete technical support that ensures quality, reliability and value. Americhem operates nine manufacturing plants and also maintains a representative sales office in Luxembourg and Monterrey, Mexico. Central Research & Development facilities and headquarters are located in Cuyahoga Falls, Ohio. For more information visit [Americhem.com](http://Americhem.com) or call 800.228.3476.*
