CASE STUDY

CUSTOMER Major High Performance Resin Supplier

END APPLICATION Contract Manufacturing for Automotive, Oil & Gas, and Semiconductors

CUSTOMER PROBLEM A major resin supplier needed to outsource production of an entire high performance resin product line. Varying reinforcement & filler types demanded specific production and auxiliary equipment. Also, the rigorous testing requirements posed additional demands.

AMERICHEM SOLUTION Americhem Engineered Compounds promptly ran trials and proposed different filler types to meet the demanding specifications. Equipment and peripherals were modified to meet the customer's requirements. Task specific auxiliary equipment was added and a testing lab was built and equipped to certify the material.

AMERICHEM PRODUCT DESCRIPTION

- **NAME:** InElec™ & InLube™
- **PRODUCTS:** 8 variations
- **COMPLIANCES:** IATF 16949

VALUE PROPOSITION Americhem Engineered Compounds' experience allowed for quick product development that met all requirements. Quick changeovers enabled Americhem to supply multiple products within a given month. Employees were trained in specific manufacturing and testing procedures of the high performance material.

CUSTOMER SUCCESS STORY Americhem's success has provided the customer the opportunity to become a premier supplier in this high performance market. It has also provided the opportunity cost to produce other products on their existing equipment.
