CASE STUDY

CUSTOMER Leading Polymer Producer & Technology Leader

END APPLICATION Toll Manufacturing of proprietary engineering color compounds in the automotive industry

CUSTOMER PROBLEM The customer desired to produce 2 million pounds of custom color compounds for a new market. The customer did not have the capacity to accommodate the new business, nor were they able to invest in new capacity to serve this fast-growing market. The customer had very serious concerns about product contamination and cleanliness.

AMERICHEM SOLUTION Americhem Engineered Compounds was able to quickly develop a compounding process and install new capacity in a very short period of time. AEC was able to produce extremely “clean” material and help the customer grow their business by developing new formulations and bringing new products to market faster.

AMERICHEM INTERNAL PRODUCT DESCRIPTION

- **NAME:** ColorFast®
- **COLOR:** 10 customer colors

VALUE PROPOSITION Americhem Engineered Compounds provided fast and reliable tolling services that exceeded customer expectations for quality and speed. AEC was able to quickly modify the internal production schedule to accommodate the customer’s changing demands. Americhem Engineered Compound’s dedicated technical manufacturing team worked closely with the customer to help them grow their business.

CUSTOMER SUCCESS STORY The customer has established themselves as the leading supplier into this unique, fast-growing market.
