

Americhem Earns 2025 EcoVadis Silver Medal for Sustainability for Second Consecutive Year

Cuyahoga Falls, Ohio (April 10th, 2025) – Americhem, a global leader in custom color masterbatch, functional additives, engineered compounds, and performance technologies, is proud to announce it has been awarded the Silver Medal by EcoVadis for the second year in a row. EcoVadis is an internationally recognized platform that evaluates corporate sustainability across key performance areas. This recognition places Americhem among the top 15% of all companies assessed, underscoring its ongoing commitment to responsible and forward-thinking business practices.

The EcoVadis assessment evaluates companies across a wide spectrum of non-financial performance indicators, including Environment, Labor & Human Rights, Ethics, and Sustainable Procurement. Americhem's continued progress across these categories reflects its steadfast commitment to transparency and improvement.

"This recognition is a direct result of the passion and hard work of our teams around the world," said John Richard, CEO of Americhem. "I'm incredibly proud of what we've accomplished together. While this is an exciting milestone, it's also a foundation for what comes next with raising the bar, driving meaningful impact, and continuing to lead with integrity in everything we do."

As part of its continued sustainability journey, Americhem has already made significant progress towards their 2030 Sustainability Goals that were announced last year. Particular progress has been made in areas of safety and community volunteerism across all global locations. These targets mark Americhem's commitment to advancing operations, developing sustainable solutions, and empowering its people, all while giving back to the communities in which it operates.

"Sustainability is a guiding principle that has become a core strategy essential to our business," said Lauren Lutikoff, Global Sustainability Leader. "From the highest level within our organization, we are fully committed to doing our part to better the future, as we believe that sustainability is not just a responsibility, but an opportunity to create a better world for generations to come."
